Correctional Industries

A Working Solution

Correctional Industry programs contribute to the successful reentry of offenders by providing a structured environment for participants to learn the skills needed to obtain and retain post-release employment. Guided by evidence-based practices, Correctional Industries distinguishes itself by providing services that make an impact in reducing inmate recidivism.

Join NIC's latest live satellite/Internet broadcast, "Correctional Industries: A Working Solution" to examine the why, what, and how of Correctional Industry programs. See how they make a significant difference in the lives of the offender population they serve and hear from national experts, correctional practitioners, and former offenders about the promising and evidenced-practices that impact recidivism.

At the conclusion of this broadcast, participants will be able to:

- Describe the evolution of Correctional Industries going from "producing quality products" to "developing *individuals* who produce quality products."
- Explain how the incorporation of evidence-based practices helps improve program outcomes.
- Identify how Correctional Industries provides offenders with the skills they need to successfully obtain and retain post-release employment.
- Identify evidence-based training opportunities that promote professional growth and development.

Register online at *www.nicic.gov/Training/SIB10052011.*
The deadline for registration is October 5, 2011.
